

Track and Trace

- Industry leading telematics with proven ROI
- Savings in excess of 20% on fleet insurance renewal
- Reduce fuel expenditure by 15%
- Improve driving behaviour and improve safety

- Live location and vehicle status information through cloud hosted telematics.
- Web based dashboard with full MI reporting suite
- Manage access through a tiered, permissions based hierarchy
- View up to the minute data through any web enabled browser with no additional software requirements.
- Manage your fleet with live and automated reports complimented by proactive exception alerts as they happen

SAVE COSTS

Recommended by leading insurers as a valid method of reducing road risk, triggering lower fleet insurance policy renewals. Proven to influence significant reductions in fuel usage and fleet running costs.

FLEET VISIBILITY

Instant access to the location and current status of your entire fleet on one screen. Run key MI reports, review journeys and apply service scheduling and automated exception alerts.

DRIVING SCORING

Unique algorithms monitor your driver telemetry to highlight negative driver behaviour. Effective driver feedback and education will reduce on the road risk resulting in lower insurance premiums and fleet running costs.

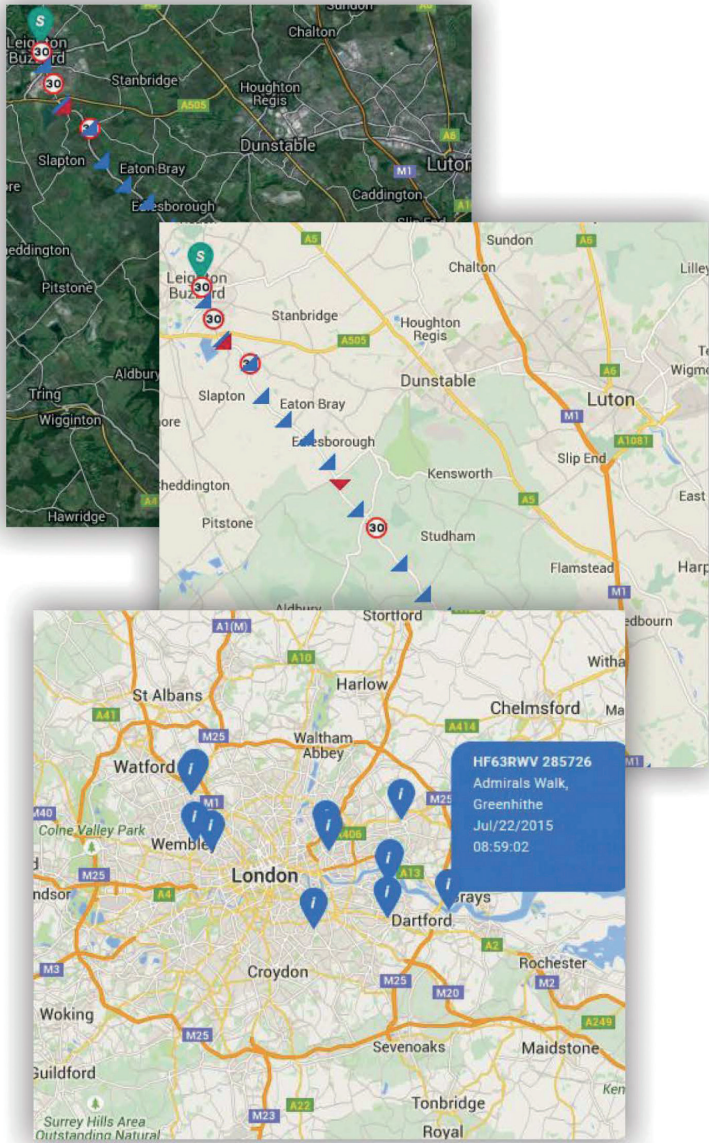

BUSINESS PRIVATE MILEAGE

Accurate mileage capture provides drivers with a HMRC compliant way of separating business and private journeys and submit business mileage claims.

CRASH ALERTING

Automated first notification of loss will alert personnel in the event of a vehicle collision. Granular telemetry recreates events immediately before and after the point of impact which can prove invaluable in disputed blame scenarios.

Specification
